## Quantum Artist Researcher

**“Exists a lot more than what we see...”**

Born in Ghedi (Bs) in 1965, as a child Manuela Nicolini is attracted by the magic of colors.

After the school of dress designer has work experience in various fields which lead her to know different realities together.

Her research is to give a deeper meaning to her life, convinced from an early age that:

"Exists a lot more than what we see".

She discovers a particular interest in the human being and the meaning of life and embarks on an inner journey accompanied by studies and insights of psychology, esotericism, Eastern traditions and, more

recently, quantum physics, working at the same time through energy by Shiatsu and Reiki courses and personal research on crystals, and Chakras.

All that she discovers joined her experience of life and helps to better understand the mechanisms that regulate human life. Then combines the art of soul searching at the artistic research and testing of different materials and techniques. Her great desire to create and to communicate to others what it finds in her path, bring her to decide to dedicate her life, renouncing up the certainty of the "known" to enter the world of possibilities.

# AQVACOLOR 4D™

## Art of Conscious Creation

Through an inner journey that combines spiritual research and studies on quantum physics, Manuela arrives at an understanding that each of us is a "creator" and has the power to create the life that desired, if acts with this awareness. Is with this new awareness that continues her career with a new purpose: to create artworks that may contribute to the co-creation of desired reality, keeping active inside herself her thoughts and emotions in tune with what herself desired to manifest.

Through **AqvaColort 4D**, the artistic expression born from this new intent, Manuela gives her way of making art more meaning.

"*The Art of Conscious Creation*" and "*Art that is the marriage between Consciousness and Matter*" are the definitions that herself loves to use to invite the public to a new approach to the art.

*"...My intention is create artworks that transmit the vibrations of Love, Beauty, Joy, Harmony, Prosperity, Power ... for me and for the world in which I live ..."*

## AQVACOLORINI™

live with joy and lightness

Playing and dancing were born **AQVACOLORINI**, "children" of AQVACOLOR 4D.

They are artworks of small size (between 10 and 20 cm). They represent the playful and joyous side of life, a way to lighten up and get back to feeling like children, recalling in this way positive energy that expand around us and involve other people. According to the artist "*Issuing Joy we attract even more Joy in our life.*".

# PROJECTS

*"The project is the divine ability of the human..."* (Giordano Bruno)

**SOULAnima ArtProject™** is a multimedia project that tells the soul of an abandoned factory and her factory. Made in collaboration of Manuela Nicolini with Manuel Giacometti in 2009, was born just for fun, with the intent of giving life to a character that would represent change, rebirth, "a new light" of an idea, a project, a relationship, or Whatever your heart desires, from what seemed to be destroyed and forgotten, represented in this case by an old abandoned factory and seemingly useless.

This indicates that all Could be rebuilt, reconstructed, renovated, given a new light, in fact. Is essential the imagination because, as the story goes, "the Soul knows that to turn things must first" see "and then let your imagination go and start creating. The project consists mainly of photographs taken by SHAMIRS that did exceptionally a model Manuela, "dancing and playing" really the rubble, plunging into the character of the Soul. The images are accompanied by thoughts written by Manuela that tell the story of the Factory's Soul and how you can rebirth to

new life even where they appear only rubble.

To complete the project, in addition to the website, [www.soulanimaproject.net](http://www.soulanimaproject.net), a book and an interactive video, which is projected in such a way that the public can enter the scene and become part of it.

**"4 POWERS"** is a project born in 2010 from an intuition. The intent of Manuela was to create artworks that could "awaken" the powers that everyone has within itself and

allow we to create the life we desire, when we became conscious. Power of Love, Power of Intention, Power of Faith, Power of Gratitude are the four artworks arising from this consciousness. The artworks were carried out through intuition and "enhanced" each according to its meaning. They go to act in our right hemisphere, one connected to the unconscious and to our potential, the hemisphere with which we can connect with our divine essence.

**ArtAttractor™ attract by art**  
**Or else how to create through the art the Life we desire.**

To this end, was born the project ArtAttractor and the site that responds to this request ([www.artattractor.com](http://www.artattractor.com)), for those who are aware of their power to create the reality they desire, through their thoughts and emotions. The intent of ArtAttractor, it says the name suggests, is to create artworks that help to attract what we desire, combined with a conscious work on itself.

According to the "Law of Attraction", another name for the "Law of Love", things, situations and people who vibrate at the same frequency attract and, according to *quantum physics*, all the possibilities we can imagine there are already at the same time, although we have no perception.

*These are the principles underlying the making of the artworks to Manuela Nicolini through ArtAttractor, which is performed on demand, according to the desire and the aspirations that you want it to manifest in own life.*
